

BP8000

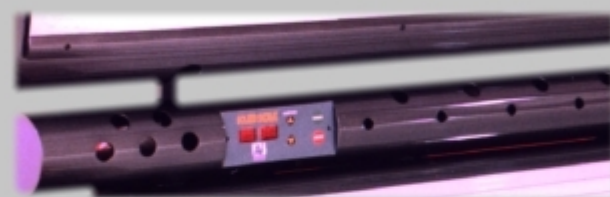

GRAND SOLEIL

FACE & BODY SOLARIUM

The **BP8000** is a tanning bed with a mixed UVA emission system:

46 low pressure reflector tubes provide optimum risk-free tanning for the body and 4 high pressure lamps tan the face and neckline. The option to operate the two sets of lamps separately makes the P8000 a versatile piece of equipment. The "Turbo Pipe" client ventilation system provides uniform cooling action, enveloping the client in a cool breeze (air conditioning is optional). Electrical raising of the upper part (with panic button system), radio/cd, and electronic microcontroller controls complete the BP8000's equipment.

TECHNICAL FEATURES:

POWER SUPPLY VOLTAGE:	380V 3F+N
TREQUENCY:	50Hz
POWER INPUT:	8,5kW
EXHAUST GAS FLOW RATE:	1.900 m ³ /h
TEMPERATURA AMBIENTE DI ESERCIZIO MAX:	30°C
TIMER AND CONTROLS:	Microprocessor
EQUIPMENT:	Radio / cd player
	Head cushion
DIMENSIONS - L x P x H (cm):	220 x 150 x 170
WEIGHT:	300kg
